

COMPOSITES SOLUTIONS

COMPOSITES
vci

*A strategic
partner
since 1987*

Reasons why makes it possible

Our expertise

An experienced engineering and technical team offers complete, customized and integrated solutions to meet clients needs:

- Process optimization
- Precise tooling conception
- Process standardization
- Training and production support

Our equipment

Our well-equipped facilities offer up-to-date technologies:

- 145 000 ft² building on 1 600 000 ft² of land
- 720 ft² paint shop
- Testing laboratories
- 5 axis machining device
- 200 ft² Oven (up to 400 ft²)
- And more

Our quality control

We use various metrology techniques to ensure process control at all levels. The process includes activities such as:

- Jigs and tooling inspection
- Process capability analysis
- Process audits
- In-process inspections

VCI leads your custom projects to success

- Integration of various components
- Converting traditional parts (wood, casting and metal) to composites
- Structural parts
- Large parts
